

# BE HALLOWEEN Safe

Halloween is a fun, and spooky, time of year for kids. Make trick-or-treating safe for your little monsters with a few easy safety tips.

Sparky® is a trademark of the NFPA.

## HALLOWEEN FIRE SAFETY TIPS

- »» **When choosing a costume**, stay away from long trailing fabric. If your child is wearing a mask, make sure the eye holes are large enough so he or she can see out.
- »» **Provide children** with flashlights to carry for lighting or glow sticks as part of their costume.
- »» Dried flowers, cornstalks and crepe paper catch fire easily. **Keep all decorations** away from open flames and other heat sources like light bulbs and heaters.
- »» **Use a battery-operated** candle or glow-stick in jack-o-lanterns. If you use a real candle, use extreme caution. Make sure children are watched at all times when candles are lit. When lighting candles inside jack-o-lanterns, use long, fireplace-style matches or a utility lighter. Be sure to place lit pumpkins well away from anything that can burn and far enough out of the way of trick-or-treaters, doorsteps, walkways and yards.
- »» **Remember** to keep exits clear of decorations, so nothing blocks escape routes.
- »» **Make sure** all smoke alarms in the home are working.
- »» **Tell children** to stay away from open flames including jack-o-lanterns with candles in them. Be sure they know how to stop, drop and roll if their clothing catches fire. (Have them practice, stopping immediately, dropping to the ground, covering their face with hands, and rolling over and over to put the flames out.)

If your children are going to **Halloween parties** at others' homes, have them look for ways out of the home and plan how they would get out in an emergency.

### Did you know?

Decorations are the first thing to ignite in **900** reported home fires each year. Two of every five of these fires were started by a candle.

# Candle Safety

Candles may be pretty to look at but they are a cause of home fires — and home fire deaths. Remember, a candle is an open flame, which means that it can easily ignite anything that can burn.

## "CANDLE WITH CARE"

- » Blow out all candles when you leave the room or go to bed. Avoid the use of candles in the bedroom and other areas where people may fall asleep.
- » Keep candles at least 12 inches away from anything that can burn.

Think about using flameless candles in your home. They look and smell like real candles.

## IF YOU DO BURN CANDLES, make sure that you...

- » Use candle holders that are sturdy, and won't tip over easily.
- » Put candle holders on a sturdy, uncluttered surface.
- » Light candles carefully. Keep your hair and any loose clothing away from the flame.
- » Don't burn a candle all the way down — put it out before it gets too close to the holder or container.
- » Never use a candle if oxygen is used in the home.
- » Have flashlights and battery-powered lighting ready to use during a power outage. Never use candles.

## Candles and Kids

Never leave a child alone in a room with a burning candle. Keep matches and lighters up high and out of children's reach, in a locked cabinet.

## FACTS

- ! **December** is the peak time of year for home candle fires.
- ! Roughly **one-third** of home candle fires start in the bedroom.
- ! More than half of all candle fires start when things that can burn are too close to the candle.
