Re: Analysis of San Francisco Fire Department Data Regarding Fire-Related Deaths or Injuries Occurring in the “SFFD Highrise Retrofit-Sprinkler Mandate - List of Affected Buildings”

Results:

San Francisco Fire Department records establish that there have been no fire-related deaths (either occupants/civilians or SFFD Firefighters) in any of the 126 buildings covered by the pending Retrofit Mandate from 2003-the present.

Those records further establish that 122 of the 126 buildings covered by the pending Retrofit Mandate had no fire-related injuries (either occupants/civilians or SFFD Firefighters) over the same period.

Four of the 126 buildings covered by the Retrofit Mandate had a total of four fire-related incidents which occasioned a total of 10 occupant/civilian injuries over that period, none of which resulted in a death.

The three fire incidents resulting in injury were:

- Incident number 8107231 on 2008/12/16 at 947 Bush St. resulted in 3 civilian injuries
- Incident number 23062776 on 2023/05/09 at 6 LOCKSLEY AVE resulted in 5 civilian injuries
- Incident number 11117742 on 2011/12/21 at 737 Post St resulted in 1 civilian injury
- Incident number 25141870 on 2025/10/05 at 350 Turk St resulted in 1 civilian injury

I attach a pdf spreadsheet reflecting the analysis of these datasets from the SFFD; I will maintain the underlying Excel worksheets, which can be made available as you see fit.

How we reached these numbers:

Each of the 126 high rise addresses in the list titled “SFF Highrise Sprinkler Mandate - List of Affected Buildings” was checked against the data in [DataSF | Open Data Portal > Fire Incidents](#). No incidents recorded a fire-related death. Three incidents were found to have caused a total of 10 occupant/civilian injuries.

These four incidents were then checked against the [DataSF | Open Data Portal > Fire Department and Emergency Medical Services Dispatched Calls for Service](#) database to cross-check and confirm the incident and to determine how many and what type of medical units were dispatched to those addresses on the days of the incidents.

The following data was used in this analysis:

DataSF | Open Data Portal > Fire Incidents

https://data.sfgov.org/Public-Safety/Fire-Incidents/wr8u-xric/data_preview

Summary of data:

Fire Incidents includes a summary of each (non-medical) incident to which the SF Fire Department responded. Each incident record includes the call number, incident number, address, number and type of each unit responding, call type (as determined by dispatch), prime situation (field observation), actions taken, and property loss.”

Dates of data:

January 1, 2003 - August 17, 2026

DataSF | Open Data Portal > Fire Department and Emergency Medical Services Dispatched Calls for Service

https://data.sfgov.org/Public-Safety/Fire-Department-and-Emergency-Medical-Services-Dis/nuek-vuh3/data_preview

Summary of data:

Fire Calls-For-Service includes all fire units' responses to 911 calls from the city's Computer-Aided Dispatch (“CAD”) system. This includes responses to Medical Incidents requiring EMS staff. Each record includes the call number, incident number, address, unit identifier, call type, and disposition. All relevant time intervals are also included. Because this dataset is based on responses, and since most calls involve multiple units, there are multiple records for each call number. Addresses are associated with an intersection or call box, not a specific address

Dates of data:

April 12, 2000 - August 17, 2026
