Dear Council Members,
It seems clear that the only ones benefiting from this mandate are the union workers.

Statistics show that there has been no large number of deaths in these buildings or of firefighters on site! The potential risk is not worth the kind of money that has been outlined by independent and qualified consultants.

Many of us will be forced out of the city by the high costs of the mandate and the dislocation. San Francisco does not need this black mark on its "recovery."

Please carefully consider reversing this inane ordinance that was passed without any input from residents or the public generally.

Respectfully Submitted,
Susan Ford
